

How to Create a Wylie App Account

How to Create a Wylie App Account:

You should have received an invitation by email from your clinic with the subject "Invitation to use our mobile app", where you will be prompted to follow a link to register an account.

In the email, follow the first link and enter your email address.

The image shows a mobile app registration screen. At the top, there is a blue header with the text "Wylie App". Below the header is a blue circular icon containing a white padlock symbol. Underneath the icon is the word "Register" in a bold, black font. Below "Register" is the instruction "Please enter your email address." in a smaller, grey font. This is followed by a white rectangular input field with a thin grey border, containing the placeholder text "Email Address *". Below the input field is a solid blue button with the word "Continue" in white text. At the bottom left of the screen, there is a blue link labeled "Back".

Then, you will receive another email with a verification code. Go to your email and copy the code, then paste the code where it indicates 'Enter the code that was sent to' on the app and select 'Continue'.

Wylie App

Register

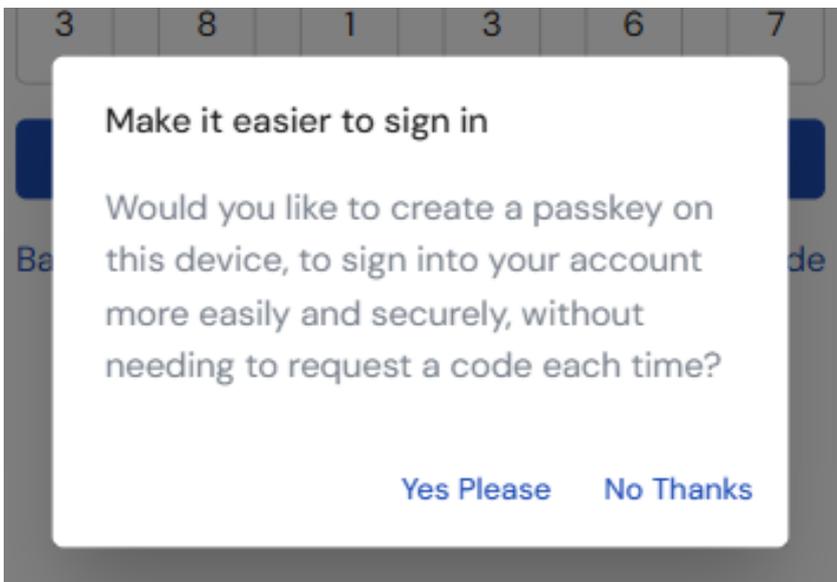

Enter the code that was sent to
d.celina@wyliesystems.ca.

[Send new code](#)

You may be prompted to create a passkey for quicker logins in the future. If you select 'Yes Please', then 'Create Passkey', your device will then prompt you to create a passkey, as this is a process specific to your device. Once you have successfully created a passkey, you will then be logged into the app.

Create a new passkey

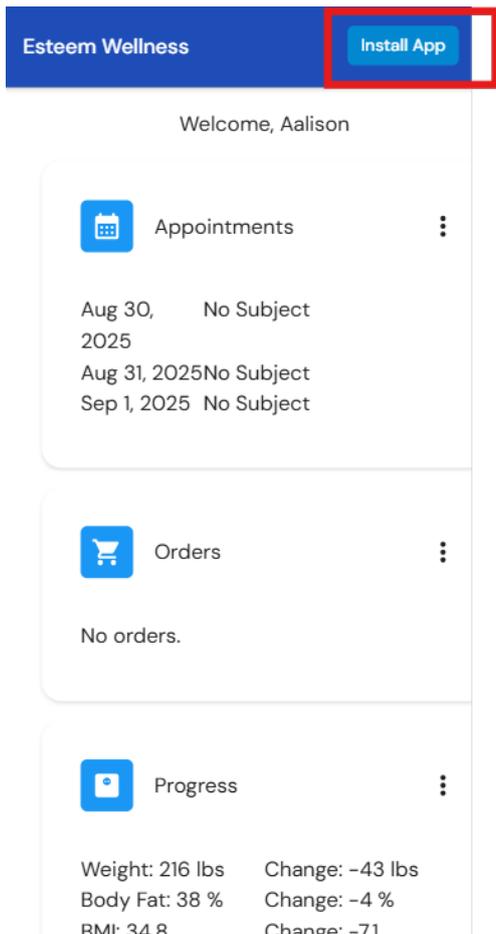

Click the Create Passkey button below to create a new passkey on your device. You may be asked to prove your identity using your device PIN, fingerprint, or other method.

 Passkeys are stored locally on your device. This app will never receive any biometric data or other information related to your passkey. [Click here to learn more.](#)

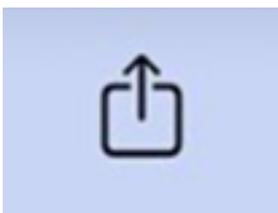

[Create Passkey](#) [Cancel](#)

If you choose 'No Thanks' to creating a passkey, you will be prompted to enter a verification code every time you log in.

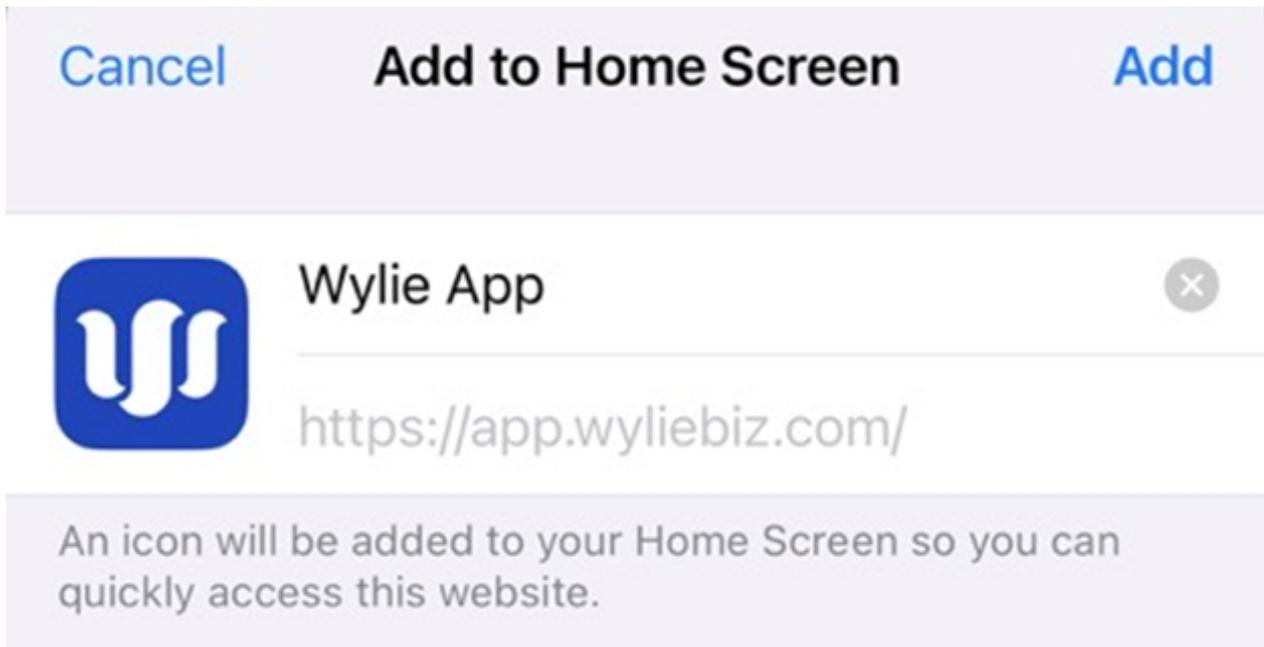

Once you have logged in, if you see the 'Install App' button in the top right corner, select it, and then you will see the Wylie W logo on the home screen of your device.

If you do not see the 'Install App' button, then select the share icon in your browser, which looks like this:

Then scroll through the options until you see the option to 'Save To Home Screen' and select. Then select 'Add' in the top right corner.

Then you will see the App on your home screen for easier access.
